

EST-DUCT

Autodesk®
Authorized ISV Partner

EST-Duct is a both a leading 'Stand Alone' Estimating Program AND an Estimating/ Costing program that as part of the **CAD-Duct** manufacturing system, offering seamless integration with the **CAD-Duct** manufacturing module and/or our **CAD-Duct** Design/ Build module, and makes use of the same seam, connector and specification databases to ensure accurate and automated estimating of **CAD-Duct** drawings and **CAD-Duct** Fabricated Jobs.

EST-Duct is based on SMACNA industry standard fitting definitions and specifications.

EST-Duct features include:

- *Design-Line* Takeoff Tools for Fast and Accurate 3D On-Screen Takeoff.
- Automated Duct Sizing tools with *Design-Line* for easy, accurate Design/ Build Estimating
- Full integration with **CAM-Duct** and **CAD-Duct**, allowing automated Design/ Build Estimates from CAD Drawings and Automatic Estimating for Fabrication Shops.
- Advanced Analysis and Reporting from **EST-Duct** with an automated EST Reporting Tool in Excel including pounds, areas, quantity of pieces and hours of all items.
- Pre-loaded with 'industry standard' Labor Times Tables (user changeable).
- Customize-able more accurate labor tables and configuration options
- Digitizer Paper Drawing Takeoff Abilities including Customizable Digitizer Templates
- Material Pricing of Catalogues by Part Number
- Customizable reporting and detail printouts, including CAD/ CAM and Project Management Labor Planning and Procurement.
- Optional user-configurable 'output' file format for integration with external third party modules.
